

INTERIOR RENDERINGS

Yale University Hospital Dining

Role: Job Captain / Designer

Status: RFP

Description: This ABM RFP was larger than usual which typically produces five or more renderings and a floorplan. Yale University had a much larger space which gave more "flavors". The open space allowed for better wayfinding in the serving space. The dining area had large windows to an open air atrium which gave the entire space great light. This gave the coloring/ wayfinding a much more inviting feeling while being easy to distinguish.

INTERIOR RENDERINGS

Westerly Hospital Servery Remodel

Role: Job Captain / Designer

Status: RFP

Description: This RFP ran at the same time as Yale and got a similar treatment. This was consistent throughout the millwork design, "flavor" sections, and similar flow concepts. This space was small with very low ceilings which made it was a challenge to make the space feel larger. Light and warm colors were used to brighten up the dark existing feel of the space.

OHSU Mission Control OHS9

Role: Job Captain

Status: Permitting

Size: 4,157 SF

Hours: 245

Description: OHSU MC has been attempting to start for years through their project startup system. The space and time was finally right to revamp the entire suite to accommodate a group of people that manage all of OHSU helicopters, ambulances, incoming patients, and open hospital beds on campus. The space required a massive amount of LCD screens and workstations with tons of client coordination for an optimal work environment and smooth transition into the new space utilizing 2 other building for interim work.

Santiam Hospital Emergency Dept.

Stayton, OR

2022-2023

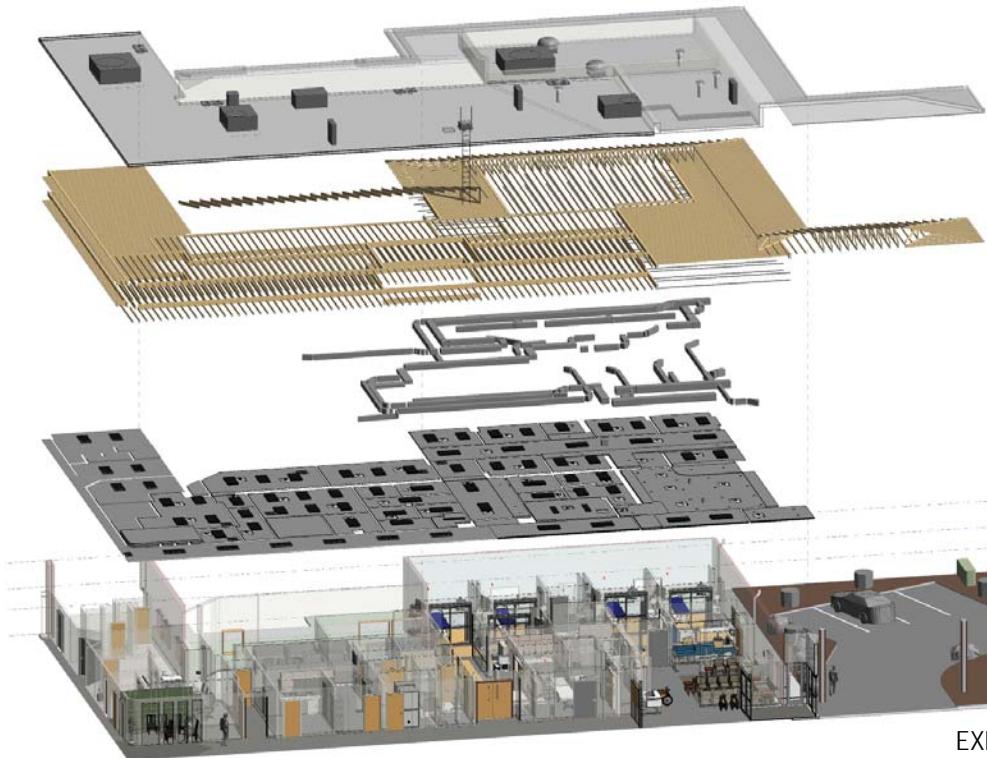

Role: Job Captain / Designer

Status: Permitting

Size: 4,652 SF

Hours: 499

Description: The client needed some assistance making some marketing materials to gain interest in the hospital to acquire investors. Stayton Oregon has two large lumber companies in town which would be featured in a new Emergency Department Entrance. This also involved redesigning the Ambulance Garage across the street. Plans and Renderings were used to acquire \$2 million for the ED project and future work.

Auburn MC Infrastructure Upgrade

Role: Job Captain

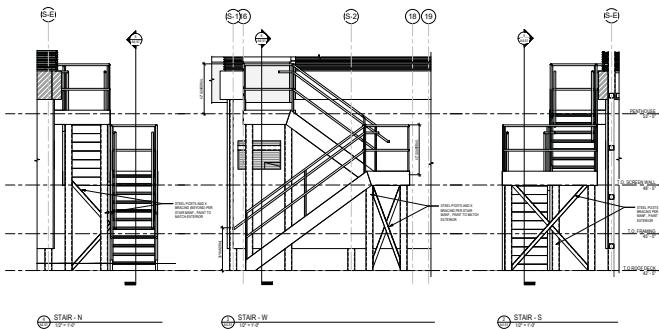

Status: Permitting

Hours: 161

Description: Demolition and Replacement of roof air handling units and equipment. New connections to existing mechanical duct work. The chases and shafts not adequate for ducts, so they needed to be on the exterior of the building and enclosed to replicate the existing facade. Penetrations needed to be monitored due to existing structural exterior bearing walls. The facade also had to be extended up to screen views from local traffic.

OHSU Mail Order Pharmacy

Role: Job Captain

Status: Built

Size: 12,506 SF

Hours: 652

Description: OHSU had two needs come together in this two phase project. The Nimbus Pharmacy needed to up size with the growing mail order pharmacy while the call center needed an upgrade. The past use manufacturing facility was perfect for a mixed use of office and a non compounding pharmacy that needed more space for shipping. This project consisted mainly of the extension to fire walls and equipment coordination with vendors.
